Title: <bOdYbGcOlOr1> The tragic horror of Lathiari & Kyrnia

Author: Historian Laurette

 Part of the original
pre-release Beta plotline,
Kyrnia and her fraternal
twin brother Lathiari
were raised in the
arrogant mage city of
Magincia. The two showed
great abilities <next>
at early ages, focusing on
alchemy and then after
their fathers death,
necromancy. Inventors of
a life-preserving amulet,
the pair froze their
mothers dead corpse while
studying ways to revive
her, though their efforts
ultimately brought forth
a angry curse upon them
from her. Having been
caught 'researching' on
soldiers corpses, the two
were forced to leave
Magincia for Yew, <next>
where they built a large
tower and continued thier
unnatural researches, this
time with the bodies of
monsters, the elderly, and
even children. Lord British
himself issued a decree
to the Yew militia to
banish them from
Britannia for all time
though it was never
served since the pair
disappeared quietly.
 In the early months of

Uo's live history, Kyrnia
and Lathiari were <next>
seen again, but this time
as regenerating Liches
who now had a machine
built of corrupted
shrinestone, blackrock,
which raised the dead
into a army for them.
Their assaults on Yew
drew the attention of
Sage Humbolt, who traded
away his magical items of
power to those who would
bring him pieces of
blackrock to aid his
studies into how to fight
the Liches. <next>
Lord Blackthorn was
kidnapped and forced into
a red gate to lshenar by
the Liches, in their
effort to keep him
from thwarting their
attacks on Yew. Sage
Humbolt gave his life
to rid Britannia of the
liches by eating their
poison hearts, found at
the bottom of Dungeon
Despise, given strength to
do so by a potion
powered by the magic of
the Bell of Courage,
though not enough to
survive the experience.
